

# azure-2024Xiac-terraformXazure-aksXpipelines

## CI Pipelines deployment Azure AKS

### Overview of the CI Pipelines

The screenshot displays the GitLab CI Pipelines page for the project `azure-2024 / iac-Terraform / azure-aks`. The page shows a list of pipelines, all of which are in a 'Passed' status. The left sidebar indicates the project structure, with 'Pipelines' selected under the 'Build' section.

Status	Pipeline	Created by	Stages
✓ Passed 00:01:25 1 month ago	Merge branch '201-aks-acr-identity' into 'main' #1266523424 201-aks-acr-identity b07aa611 latest		✓ ✓
✓ Passed 00:11:20 1 month ago	Merge branch '201-aks-acr-identity' into 'main' #1266514285 main b07aa611 latest		✓ ✓ ✓ ✓
✓ Passed 00:01:30 1 month ago	Merge branch '201-k8s-cluster-with-tf-and-ak...' #1266296024 201-k8s-cluster-with-tf-and-aks b2bd6863 latest		✓ ✓

Merge the branch into main branch triggers the deployment to Azure

```
26 $ terraform init
27 Initializing the backend...
28 Initializing provider plugins...
29 - Finding hashicorp/azurerm versions matching "~> 3.0"...
30 - Finding latest version of hashicorp/random...
31 - Installing hashicorp/azurerm v3.100.0...
32 - Installed hashicorp/azurerm v3.100.0 (signed by HashiCorp)
33 - Installing hashicorp/random v3.6.1...
34 - Installed hashicorp/random v3.6.1 (signed by HashiCorp)
35 Terraform has created a lock file .terraform.lock.hcl to record the provider
36 selections it made above. Include this file in your version control repository
37 so that Terraform can guarantee to make the same selections by default when
38 you run "terraform init" in the future.
39 Terraform has been successfully initialized!
40 You may now begin working with Terraform. Try running "terraform plan" to see
41 any changes that are required for your infrastructure. All Terraform commands
42 should now work.
43 If you ever set or change modules or backend configuration for Terraform,
44 rerun this command to reinitialize your working directory. If you forget, other
45 commands will detect it and remind you to do so if necessary.
46 $ terraform -v
47 Terraform v1.8.2
48 on linux_amd64
49 + provider registry.terraform.io/hashicorp/azurerm v3.100.0
50 + provider registry.terraform.io/hashicorp/random v3.6.1
51 $ terraform apply --auto-approve plan
52 Acquiring state lock. This may take a few moments...
53 random_pet.rg: Creating...
54 random_pet.rg: Creation complete after 0s [id=demo-tfquickstart-pup]
